

We are pleased to announce Kurzweil 3000™ Macintosh® v4.5 Web License

Now Macintosh users can access Kurzweil 3000
over an Internet connection!

We are pleased to announce the release of the Web License edition of Kurzweil 3000 for Macintosh v4.5. Using the same VPORT™ license manager as Kurzweil 3000 for Windows, Kurzweil 3000 Macintosh v4.5 is now available anywhere you have an Internet connection.

(All Mac users can download the latest update to v4.5 from www.kurzweiledu.com/downloads)

Benefits for the student:

- Access to all the great Kurzweil 3000 for Macintosh tools from any client connected to the Internet.
- Roaming User Profiles provide access to individually customized sets of Kurzweil 3000 reading, writing, and study skills tools to assist in completion of assignments, research, or projects.

Benefits for teachers and specialists:

- Manage licenses anywhere an Internet connection exists.
- Provide support tools necessary for students to complete work anywhere a Kurzweil 3000 Web License client is installed.

Benefits for schools:

- Meet students needs at all tiers of RtI.
- Economical way to share licenses between school and home.

Benefits for districts:

- Allows districts to maximize the value of each concurrent license by sharing them across district buildings.

Great news for existing
Kurzweil 3000 Windows v12 Web License users!

If your district also has Macintosh computers, you can simply [download](#) the Kurzweil 3000 for Macintosh v4.5 Web License client and use your current Windows usernames and passwords to begin use immediately.

No purchase necessary!

The software will simply use one of your currently owned licenses upon login.

Existing Macintosh v4 users,
download your update today!
